IMMUNIZATIONS OF STUDENTS

Any student being admitted to the district must present proof of immunizations in accordance with the current State of New Hampshire School Immunization Requirements as outlined by the Department of Health and Human Services.. Failure to comply with this provision may result in exclusion from school for the student. The school nurse, principal or designee is responsible for documenting that all students have been immunized prior to school entrance in accordance with RSA 141-C:20-a.

Principals will notify parents of this requirement at the earliest possible date, so that the necessary plans can be made with the healthcare provider to accomplish this standard prior to a student being admitted to school.

A student shall be exempted from the above immunization requirements if s/he presents written documentation in accordance with RSA 141-C:20-c from his/her healthcare provider that the immunization would be detrimental to his/her health. A student will be excused from immunization for religious reason, upon the signing of a notarized form by the parent/guardian stating that the child has not been immunized because of religious beliefs.

In the event of an outbreak, students who have been exempted from immunization requirements will be excluded from school for a period of time, to be established after consultation with the NH Dept. of Health & Human Services, if such students are considered to be at risk for the disease that they have not been immunized against.
